AYANFEOLUWA SOGELOLA (GMNSE)

Frontend Engineer

Nigeria | Remote
Portfolio | GitHub | LinkedIn | ayanfe.sogelola@gmail.com

Professional Summary

Frontend web Engineer with experience designing, developing, and deploying responsive, accessible, and high-performance web applications from concept to production. Skilled at translating business requirements into scalable user interfaces, integrating backend services, implementing secure authentication workflows, and delivering seamless user experiences. Experienced collaborating with clients and cross-functional teams while applying reusable component architecture and performance optimization.

Technical Skills

Programming Languages: HTML5, CSS3, JavaScript (ES6+), TypeScript.

Frontend Technologies: React, Next.js, Astro JS, Tailwind CSS, Webflow, Chakra UI.

Databases & Cloud Services: PostgreSQL, Supabase.

Web Development: Responsive Web Design, No-Code/Low-Code Development, REST API Integration, Authentication, State Management, Component-Based Architecture, Accessibility (WCAG), Performance Optimization.

Developer Tools &Platforms: Git, GitHub, Vite, Prisma, tRPC, Cloudinary, OAuth, Vercel.

Professional Experience

GUI BEAUTY

Frontend Engineer | Remote **(Jan 2026 - Present)**

- Developed 10+ responsive customer-facing pages, including product listings, category pages, product details, shopping cart, and checkout workflows, contributing to a seamless shopping experience across desktop and mobile devices while maintaining a Lighthouse Performance score of 100 through frontend optimization and efficient rendering.
- Collaborated with backend engineers to assess project outcomes, integrate commerce services and dynamic product data.
- Built reusable UI components to improve maintainability and consistency.
- Implemented responsive layouts across desktop, tablet, and mobile.
- Contributed to scalable frontend architecture.

HNG Internship

Frontend Web Developer Intern | Remote **(Aug 2025 - Oct 2025)**

- Collaborated within an agile software development team to deliver multiple production-ready web and mobile applications under project deadlines.
- Worked with designers, frontend developers, and backend engineers to translate product requirements into reusable, responsive user interfaces.
- Contributed to the successful delivery of two full-stack applications during the internship program.
- Applied modern software engineering practices, including component-based architecture, version control, and collaborative development, while working on real-world products under project deadlines.

Selected Project Experience

E-commerce Storefront

- Created a responsive e-commerce storefront that enables users to browse products, navigate categories, and manage shopping cart interactions through an intuitive and user-friendly interface.
- Designed reusable interface components and implemented responsive layouts that provide a consistent shopping experience across desktop, tablet, and mobile devices.
- Organized the application for maintainability and performance, delivering a scalable frontend architecture that supports future feature enhancements.

Ticket Management Platform

- Fostered a responsive ticket management application that streamlines issue tracking through secure authentication, interactive dashboards, and complete ticket lifecycle management.
- Executed full CRUD functionality that enables users to create, update, assign, and resolve tickets while maintaining a seamless experience across desktop and mobile devices.
- Built reusable interface components and organized the application using a scalable frontend architecture that improved maintainability and simplified future feature development.

Cross-Platform Productivity Application

- Built a cross-platform productivity application that enables users to organize, manage, and track daily tasks across multiple devices.
- Applied real-time synchronization to ensure users always have access to the latest task information while designing intuitive mobile experiences focused on usability, responsiveness, and performance.
- Tailored the application using reusable components to support scalability and long-term maintainability.

Software Engineering Projects

Blogged: *Full-Stack Blogging Platform*

Launched a full-stack blogging platform that enables authenticated users to create, edit, organize, and publish articles securely. Designed protected authentication workflows, integrated cloud-based media management for image uploads, and established reliable communication between the

frontend and backend to support seamless content management. The application was structured using reusable components and a scalable architecture to simplify future feature development and long-term maintenance.

E-commerce Store*: Frontend Web Application*

Established a responsive e-commerce web application that allows users to browse product collections, explore product details, and interact with a shopping cart through intuitive navigation and a streamlined shopping experience. Designed reusable interface components and organized the frontend architecture to improve maintainability while delivering a fast, responsive experience across multiple screen sizes.

REST API: *Backend Service*

Designed and deviced a modular backend service that provides secure authentication and complete CRUD functionality for web applications. Built RESTful endpoints to facilitate reliable communication between frontend clients and the database while organizing the application into a maintainable architecture that supports future expansion and efficient data management.

Education

University of Ilorin - Kwara, Nigeria

Bachelors of Engineering - Civil Engineering **(October 2023)**

- Specialized in Structural Engineering

Certifications

- National Youth Service Corps (NYSC)
- Graduate Member, Nigerian Society of Engineers (GMNSE)
- Professional & Entrepreneurial Skills – MegaRich Consults & Networks Ltd
- Publicity & Communications Volunteer – JJ Classics Production
